// summary.ts

Full-stack developer with 4+ years in Finland — React, Next.js, WordPress, Node.js. Currently Tech Lead at GoDoc (funded fintech) and Full-Stack Developer at JJ-NET OY, where I maintain 150+ production WordPress sites and have built 25+ from scratch for major Finnish organisations including Helsinki City, the Finnish Museums Association, and Netox. Comfortable as both hands-on engineer and technical lead — I have rescued failing codebases, solo-architected complex systems from scratch, and stepped in as sole technical decision-maker at a funded startup. Worked across multiple startups, built a multi-agent AI prototype for investor demos, and am starting an MSc in Cybersecurity in 2026. Open to full-time roles in Finland and remote roles across Europe.

// experience.ts

Tech Lead / CTO · GoDoc, Helsinki

2024 – Present

// €10k funded fintech · part time

- Sole technical lead — rescued failing codebase, rebuilt and maintains ASP.NET API, React web client, and React Native mobile app.
- Owns all architecture, deployment, and technical decisions. Platform connects banks with courier networks for secure document delivery.

ASP.NET Core · React · React Native · SQL Server · Azure · REST API

Full-Stack Developer · JJ-NET OY, Finland

Sep 2023 – Present

// full time

- Maintains 150+ WordPress sites for Helsinki City, Finnish Museums Association, Netox, Proventia, and BusinessNokia.
- Built custom React/Gutenberg block systems; solo-architected Empa — a full custom WordPress theme system with React block manager, pattern dependency resolver, and multisite support — over 1+ year.

React · TypeScript · PHP · WordPress · Gutenberg · ACF · Multisite

Full-Stack Developer · Aika AI, Helsinki

Oct 2024 – Oct 2025

// part time

- Stepped in after lead architect left — restored backend to working order, implemented Azure TTS/STT, and redesigned full UI.
- Built AikaCrew: multi-agent AI prototype with CrewAI + FAISS vector DB for investor demonstrations.

React · Node.js · Azure TTS/STT · CrewAI · FAISS · Python

Full-Stack Developer · Milton OY, Finland

Aug 2021 – Aug 2023

// full time

- Delivered headless CMS architectures and custom WordPress solutions for Finnish and international corporate clients.
- Built rightware.com (Vue.js + headless WordPress REST API) and multiple custom Gutenberg block-based sites.

Vue · React · WordPress · Headless CMS · Node.js · PHP

// education.ts

MSc Cybersecurity · JAMK University of Applied Sciences

2026 – present · Starting August 2026

BA (Hons) Accounting & Financial Management · University of Sunderland, UK

2014 · 2nd class with honours

Full Stack Web Development · Microverse (remote)

2020 – 2021 · 1300+ hours · Ruby, Rails, JavaScript, React, Redux
